Core Values:

Leadership

We develop leaders...

We foster trust, openness, and collaboration to develop leaders focused on sustainable, superior performance. We set positive examples and invest in personnel and subcontractors so that they can actively lead in all business areas.

Safety

No task is too important that we cannot do it safely...

We uphold a positive and proactive safety culture, and lead by example in all aspects of our business. We strive to exceed best practice and instill this value in personnel and subcontractors. Our goal is keeping people safe from harm.

Environment and Sustainability

We look after our environment for future generations...

We recognize the lasting and permanent presence of our work activities and strive to protect the environment by upholding effective and efficient environmental and sustainable practices as part of everyday business.

Integrity

We do what we say...

We conduct our business in accordance with the highest standards of professional behavior and ethics. We are transparent, honest and ethical in all our interactions with personnel, clients, subcontractors and the public.

Innovation

We anticipate change and shape it to fit our purposes...

We acknowledge the weaknesses within our industry and create ethical, forward thinking solutions to overcome them. We identify, develop and deploy leading edge construction methods, plant and equipment and process improvement tools.

Continuous Improvement

We are not satisfied with status quo...

We measure, monitor, analyze and improve productivity, processes, tasks and ourselves to satisfy clients and our own high expectations. We work with enthusiasm, courtesy and intellect, and are driven to surpass what has already been achieved. We are not afraid to stand alone, especially when it is the right thing to do.

Right People, Right Job

We create exciting opportunities for our employees, clients and communities by growing intelligently, and providing collaborative and creative environments. We provide opportunity and encouragement to help our staff reach their potential.

Mission:

- To undertake the engineering and construction business with a focus of becoming the builder of choice in every aspects to meet customer satisfaction regarding quality, on time delivery of projects and value for investments.
- To create long-term value for our customers by understanding their goals and delivering comprehensive, innovative solutions that exceed their expectations for quality and performance.
- To create a great place to work where employees are inspired and motivated every day.

Vision:

To be a leading civil contractor in Middle East and South India becoming the builder of choice, pursuing excellence through dedication, experienced and highly skilled professionals to serve our clients with a passion to deliver superior design, value for money, quality, timely and profitable projects.

Departments:

Marketing Department:

Customers are the foundation of a construction company. Our Marketing Engineers are well-trained to reflect the Client requirements in accordance to the local authorities' regulations to ensure crystal clear quotation.

Tendering Department:

The Tendering Department have high experienced draftsman, quantity surveyors and estimators to make a Custom-made QS and pricing program generated with the latest technique and updated rates to ensure the proper pricing for each project as per the scope of work.

Construction Department:

The Construction department is the core of the company. The construction department is divided into the following sectors:

1. **Civil Department:** Civil department is responsible for all the civil works from demarcation to handing over of the project.
2. **Erection Department:** Responsible of the erection of all steel structures like main frames, wall column, Steel beams, deck slabs, staircases, handrails, fixing of roof and wall cladding.
3. **MEP Department:** Responsible for the mechanical, electrical, plumbing, water supply and fire protection work, starting with the shop drawing approvals till the testing and commissioning and handing over.

Safety Department:

We operate a risk management approach to our activities whereby we identify hazards, assess the associated risks and then work to eliminate the hazards or reduce the risks to a tolerable level. For which a Site Safety Committee is formed in every site, and it consists of the Project Engineer / Site Safety Officer and Safety Representatives.

We prioritize the safety of all personnel involved with the site activities. All sites personal have been trained to take all kind of procedures at site to prevent accidents. All staffs and the labors are strictly instructed to wear PPE at all times during site working hours.

SCBC's safety principles:

- Work according to applicable safety laws, codes and regulations.
- Promote and maintain a positive safety culture.
- Review every incident and implement actions to prevent future occurrence.
- Assess and control any safety risks arising from our work activities.
- Consult our people on matters affecting their safety.
- Provide and maintain safe work equipment and places.

1. **Environmental Control Policy:** Summer City Building Contracting LLC (SCBC) always conduct our business in a way that considers the environment and which aims to keep any negative impact to a minimum. This policy is managed by close attention to achieving regulatory compliance and continually improving our environmental performance through careful selection of resources and working practices designed to minimize waste, energy consumption and emissions. Awareness of the impact that our activities may have on the environment and the management of measures to control such impacts is encouraged through our environmental principles.

- Work according to applicable environmental laws, conventions, protocols and regulations
- Promote and maintain a positive environmental culture
- Manage our activities to eliminate or reduce any potential negative environmental impact
- Consider sustainability an important element in the way we do business
- Use planning, design and risk assessment to avoid and reduce environmental risk.

2. **Health and Safety Policy:** We manage business activities to keep health risks to a minimum. We provide a healthy working environment with the appropriate level of surveillance and support. We provide expert medical support to our people to ensure that appropriate health examinations and preventative medicines are provided. We promote good occupational health by ensuring compliance with regulatory requirements and by providing clear guidance and information through our health principles.

SCBC's Health Principles:

- Work according to applicable health laws, codes and regulations
- Promote and maintain a positive health culture
- Provide and maintain healthy working conditions
- Consult our people on matters affecting their health
- Assess and control the health risks arising from our work activities
- Strive to prevent work-related ill health
- Make appropriate medical care available at all work-sites. A safe working environment by the construction, operation and maintenance of all plant, equipment and facilities.
- Adequate instruction, information, training and supervision.
- Control of all situations likely to cause damage of property and equipment.
- Effective facilities for the treatment of injuries that occur at work.
- Effective fire prevention and fire control procedure.

Quality Control Department:

Quality Control Policy: The Company's quality objectives include the following:

- The execution of a project as per contract requirements and to the satisfaction of the Client.
- Monitor and improve the implementation and the effectiveness of the QMS through audit administration.
- Use the QMS to provide a measure of the Company's performance and to regularly improve it by correcting and preventing the nonconformities and deficiencies.
- Provision of safe working conditions and safe systems and methods of work, while also minimizing the effects on the surrounding environment.

Green Building Policies

Purpose of Green Building:

The purpose of the regulations is to improve the performance of buildings by reducing the consumption of energy, water and materials, improving public health, safety and general welfare and by enhancing the planning, design, construction and operation of buildings to create an excellent city that provides the essence of success and comfort of living.

SCBC have the experts to lead the design, construction through the DM Green Regulation processes and approvals. Our experts will perform the numerous calculations and prepare submittal documents to comply with the regulation code requirements to ensure that our project is approved quickly and that our building is sustainable.

Vendor Rating Assessment

Date: March 28, 2024

Supplier Name: SUMMER CITY BUILDING CONTRACTING LLC

Supplier Code: S0486

Dear Sir/Madam,

As part of our ongoing Quality Procedures, we rate all our Suppliers on their annual performance.

After assessment of your Company's performance as a Supplier over the 12 months (from **February 2023 to February 2024**) you have achieved a rating of **A**.

Implications of ratings:-

'A' Rated Supplier – Preferred Supplier whose performance is consistently good.

'B' Rated Supplier – Acceptable Supplier whose performance requires improvement to become 'A' rated.

'C' Rated Supplier – Supplier whose performance is unsatisfactory. These Suppliers must be committed to improvement of their performance and therefore their rating.

'D' Rated Supplier – Supplier whose performance is unacceptable. These Suppliers are encouraged to improve their performance in the said area.

Add in key area for improvement and standard that is required by NTS

If you have any queries, do not hesitate to contact me.

Regards

For NTS Group
